NextPress Booker

With NextPress Booker, the future of work is at your fingertips

More than just a device, it is your smart partner in managing collaborative environments. It integrates seamlessly with your work tools, **allowing you to book, manage and automate** with a single touch.

Versatile:

Ideal for any type of space, from offices to hybrid environments.

Smart:

Integrates with the Intemo booking system, the Intemobile Access app, Microsoft Teams and with Google Calendar or any other subsystem on request.

Secure:

Manages access to rooms securely and efficiently.

Flexible:

Manages from corporate meeting rooms, coworking rooms to special rooms for events.

Automated:

Automates the registration and release of rooms.

Easy to install:

Can be installed on any surface.

Advanced design and technology

Hello future

The design of our devices is so advanced that you have never seen anything like it before.

An essential design proposal featuring high sensitivity and advanced aesthetics, suitable for a variety of usage contexts. Developed by Intemo Technologies' electronic design department under the strictest procedures and **ISO 9001** production standards, in collaboration with the product design agency **Benedito Design, National Design Award.**

The finishes of the devices are characterised by the use of **high quality materials** and state-of-the-art technology. Each component has been carefully chosen to ensure **durability, functionality and an attractive design.**

ACCESS CONTROL

Features

Full connectivity to manage from anywhere

NextPress Booker is not just a device, it is a working philosophy that puts the **user experience** at the centre.

Screen
7' LED touchscreen and presence sensor for an intuitive and efficient user experience.

Processor
1GHz processor with dual-core architecture for fast and reliable performance.

Connectivity
TCP/IP, CAN BUS and Wiegand connectivity for seamless integration with your building management system.

Efficiency
Presence sensor to enable low consumption mode when there are no users present.

Identification options
RFID/NFC/PIN card reader for secure and automated access control.

Relays and inputs
Two input/output relays to control external devices, such as lighting or air conditioning.
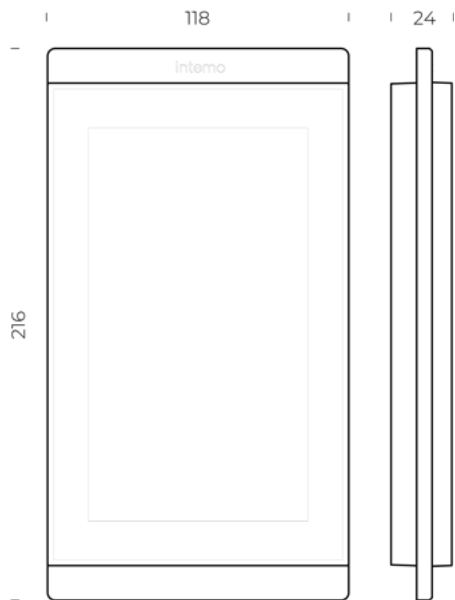

Data
Internal WebServer for easy and secure remote management.

Quality and design
Elegant, minimalist design in high-quality anodised aluminium and matt black ABS plastic.

Technical specifications: NextPress Booker

Dimensions

Screen	7" capacitive touchscreen barcode reader with adaptive backlight
Interfaces	Ethernet TCP/IP, CAN BUS
Memory	RAM 1Gb DDR3 and data capacity 8 Gb flash eMMC
Outputs	2 switchable relays for control of external mechanisms
Inputs	2 opto-isolated inputs
Cards	HF 13,56MHz, Mifare® / Desfire® / ICode® / eCard NFC for Google and Apple
Power	12 V DC / POE
Security	Cryptographic core AES-128, DES 3DES, ARC4, MD5, SHA-1, SHA-224

Our apps

The full experience
